

**Tomoaki Oyama**, National Astronomical Observatory of Japan

**Title:** Recent Development Activities of NAOJ

**Abstract**

We will report recent development activities at NAOJ.

The main contents are two points as follows;

Firstly, the progress in the development of the wide-band VLBI observing system (OCTAVE-DAS) and Software(CPU and GPGPU) correlator system.

Secondary, the plan and development progress of the Japanese balloon-VLBI project.
